Readme: After starting the program you will be on the menu. You will always return to the menu after performing an operation. There are 7 commands that can be run from the menu: Help, Exit, Display, Insert, Update, Search, and Profile. Help will display all the commands and what they do. Exit will exit the program. Display is used to display a table from the database. Insert is used to insert a new record into the database. Update is used to update or delete an existing record in the database. Search is used to search for a movie in the database. Profile is used to view the rental history of a profile in the database. All commands other than Help and Exit require additional inputs to complete. Instructions are provided along the way. Invalid inputs will give the user a message and return them to the menu.

Screenshots of program usage:

```
Please enter command, type Help for help and Exit to exit
Help
Commands:
Help: Displays help message
